Additional Information

Description

The 0402L Series PTC provides surface mount overcurrent protection for applications where space is at a premium and resettable protection is desired.

Features

- RoHS compliant, lead-free and halogen free
- Fast response to fault currents
- Compact design saves board space
- Low resistance

- Low-profile
- Compatible with high temperature solders
- 0402 size- the smallest PPTC in the market compatible with high temperature solders

Applications

- USB peripherals
- Disk drives
- CD-ROMs
- Plug and play protection for motherboards and peripherals
- PDAs / digital cameras
- Game console port protection
- Tablet and Notebook PCs
- E-readers

I hold = Hold current: maximum current device will pass without tripping in 20°C still air.

Caution: Operation beyond the specified rating may result in damage and possible arcing and flame.

WARNING

- Users shall independently assess the suitability of these devices for each of their applications
- Operation of these devices beyond the stated maximum ratings could result in damage to the devices and lead to electrical arcing and/or fire
- These devices are intended to protect against the effects of temporary over-current or over-temperature conditions and are not intended to perform as protective devices where such conditions are expected to be repetitive or prolonged in duration
- Exposure to silicon-based oils, solvents, electrolytes, acids, and similar materials can adversely affect the performance of these PPTC devices
- These devices undergo thermal expansion under fault conditions, and thus shall be provided with adequate space and be protected against mechanical stresses
- Circuits with inductance may generate a voltage (L di/dt) above the rated voltage of the PPTC device.

^{1 .. =} Trip current: minimum current at which the device will trip in 20°C still air.

V max = Maximum voltage device can withstand without damage at rated current (I max)

 I_{max} = Maximum fault current device can withstand without damage at rated voltage (V_{max})

 P_d = Power dissipated from device when in the tripped state at 20°C still air.

R min = Minimum resistance of device in initial (un-soldered) state.

_{av} = Maximum resistance of device at 20°C measured one hour after tripping or reflow soldering of 260°C for 20 sec.

0402L035SL	0.51	0.47	0.41	0.35	0.30	0.25	0.20	0.18	0.07			
0402L050SL	0.74	0.67	0.59	0.50	0.43	0.36	0.29	0.26	0.10			

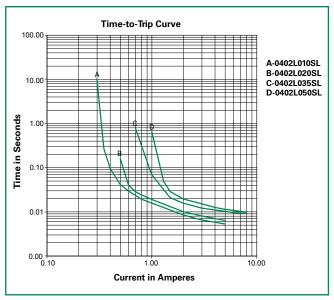

Temperature Rerating Curve

Note:

Typical Temperature rerating curve, refer to table for derating data

Average Time Current Curves

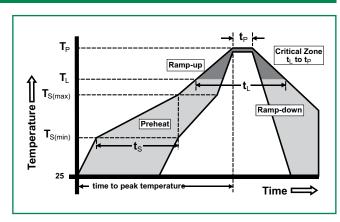

The average time current curves and Temperature Rerating curve performance is affected by a number or variables, and these curves provided as guidance only. Customer must verify the performance in their application.

Soldering Parameters

Profile Feature		Pb-Free Assembly			
Average Ramp-Up	3°C/second max				
	Temperature Min (T _{s(min)})	150°C			
Pre Heat:	Temperature Max (T _{s(max)})	200°C			
	Time (Min to Max) (t _s)	60 – 180 secs			
Time Maintained	Temperature (T _L)	217°C			
Above:	Temperature (t _L)	60 – 150 seconds			
Peak / Classification	on Temperature (T _P)	260 ^{+0/-5} °C			
Time within 5°C of Temperature (t _p)	f actual peak	20 – 40 seconds			
Ramp-down Rate	6°C/second max				
Time 25°C to pea	8 minutes Max.				

- All temperature refer to topside of the package, measured on the package body surface
- If reflow temperature exceeds the recommended profile, devices may not meet the performance requirements
- $-\,$ Recommended reflow methods: IR, vapor phase oven, hot air oven, ${\rm N}_2$ environment for lead
- Recommended maximum paste thickness is 0.25mm (0.010inch)
- Devices can be cleaned using standard industry methods and solvents
- Devices can be reworked using the standard industry practices

Physical Specifications

Terminal Material	Solder-Plated Copper (Solder Material: Matte Tin (Sn))
Lead Solderability	Meets ANSI/J-STD-002, Category C.

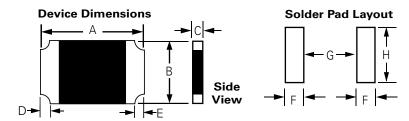

Environmental Specifications

Operating/Storage Temperature	-40°C to +85°C
Maximum Device Surface Temperature in Tripped State	125°C
Solvent Resistance	MIL-STD-202, Method 215 No change
Vibration	MIL-STD-883, Method 2007, Condition A No change
Moisture Sensitivity Level	Level 1, J-STD-020
